

# JUAN FARACCO

I am a developer with a great passion for solving problems and learning new things every day. I have professional experience working in the Front-end, and I am constantly building new personal projects to improve my skills. Currently, I am also learning about Backend development.

## EXPERIENCE

### Boost Commerce, Front-End Technical Support

November 2021 - Present

I currently work as a Front-End Technical Support Specialist, where I use tools such as HTML, CSS, Javascript, jQuery, and Shopify Liquid to support customers located all over the world who use our app, Product Filter & Search, on Shopify.

My job is to ensure that the app works correctly in the customers' stores by finding possible technical issues and resolving them, assisting them by answering their technical queries, and helping them to customize the app's functionalities.

## PROJECTS

### COUNTRIES FACTS SITE ([LINK](#)):

Informative website that displays information about the countries of the world using the REST countries API made as a challenge taken from Frontend Mentor and built using React.js and SCSS.
