

JUAN FARACCO

Frontend Developer

SUMMARY

I am a developer with a great passion for solving problems and learning new things every day. I have built a few projects by myself and I am looking for a role as a Frontend Developer where I can implement what I learned and continue growing as a professional in the matter.

PROJECTS ([LINK TO PORTFOLIO](#))

PLANETS FACT SITE ([LINK](#)): Informative website about the planets of the Solar system made as a challenge taken from Frontend Mentor and built as a React.js app using Tailwindcss. The challenge consisted of laying out the website based on the designs provided by the platform.

COVIDSTATS ([LINK](#)): A web application that contains statistical information about the situation of the COVID-19 epidemic in several countries built using HTML5, custom CSS properties, and vanilla JavaScript. It works as a searcher where the user enters a registered country's name and, by pressing the search button, a table with the data appears. The fetched data comes from a JSON file offered by the organization Our World in Data.

SUNNYSIDE AGENCY LANDING PAGE ([LINK](#)): Landing page made as a challenge taken from Frontend Mentor and built using HTML5, custom CSS properties, and vanilla JavaScript. The challenge consisted of laying out the landing page based on the designs provided by the platform.
